STATE NORMAL SCHOOL AT FITCHBURG, MASSACHUSETTS

A PROFESSIONAL SCHOOL

The public schools need teachers. The State Normal School at Fitchburg, in common with all the Massachusetts state normal schools, is maintained by the Commonwealth for the purpose of preparing teachers for its schools.

The public school is the instrument of society for initiating its new members, civilizing them, and preparing them for the world's work.

To teach is to help another to learn. The teacher must understand how children learn, what they need to learn, and how to induce them to learn when they are not eager to do so. The task of the normal school is to lead its students into this understanding, to practice them in giving this help in the most intelligent, sympathetic, and skillful way of which they are capable, and to set before them ideals toward which they will continue to strive as long as they continue to teach.

Our normal schools, if they are to prepare their students to teach, must have students who are fit, mentally, physically, and morally, to help children learn what they must learn to fit them to take their part in civilized society. The prime qualifications for teaching are to be earnest and to be teachable. The state is searching for people who possess these qualifications, who are in earnest to serve, and who will make it their chief purpose to help children on toward the highest possible usefulness. To this end it has placed normal schools where they will be accessible to all the towns and cities that employ teachers or that furnish students who wish to train for teaching.

LOCATION

The Fitchburg normal school is located where it is readily accessible to a large portion of the State, and particularly to the northern portion. It is far enough retired from the busy part of the city to be in a measure secluded, but near enough to have the advantages the city offers to students. The school is situated on

high land, over-looking a varied and beautiful landscape, in full view of Mt. Wachusett whose summit house at certain seasons reflects the rising sun at such an angle that it glistens and glows like a beacon blazing on the mountain top.

A line of trolley cars passing the grounds connects with a network of railways radiating in many directions and to long distances. Fitchburg is also exceptionally favored with steam railway lines, extending to the north, west, south, southeast, and by way of Ayer (where connections are close) again radiating east, northeast, and west, so that many students may come daily from all directions, and those from greater distances may go home frequently for week ends.

This convenience of transportation makes easy occasional visits from parents and friends and from local school officials whose visits are always welcome. All interested persons should feel it a privilege and a duty to keep in touch with our students and their instructors.

BUILDINGS AND EQUIPMENT

There are upon the school grounds five large buildings and a central heating plant. In the main building are situated most of the normal school classrooms, library, laboratories, etc. Two of the buildings are dormitories, provided with all conveniences, accommodating about one hundred and thirty students. At present these are sufficient to house all the young women students except the many whose homes are near, so that none of them are obliged to seek lodging outside. The young men find rooms in private houses. All the dormitory students, and most of the men, take their meals in a large dining-hall in one of the dormitories.

The other buildings are used for practice schools, one for the first six grades, the other for grades seven and eight. The latter school is conducted upon the junior high school plan, with differentiated courses and departmental teaching. These two schools, with two of the city schools which have been placed under the direction of the normal school, afford opportunity for a variety of practice teaching adapted to the several courses described below.

The building occupied by the junior high school is provided with shops in which the children are trained in the various practical arts. Here, too, the men in the Practical Arts course have opportunity for both shop training and practice teaching.

GREENHOUSE

PALMER HALL

There is also a large greenhouse, which was given to the school by a public spirited citizen, and which is available both for the instruction of normal students in nature study and gardening, and to some extent for producing delicacies for the dining hall.

There is a fine large library, well stocked with books, in which classes spend their few study periods during the school session, and to which many students repair for study and research during afternoons and evenings. The art department is perhaps the most generously equipped of all the departments, and the buildings are adorned with an unusual collection of fine pictures. Subways, built in part by the students, connect all the buildings. A large assembly hall in the junior high school, which is reached by all without passing out of doors, affords opportunity for assemblies of the normal students, of the children of the two practice schools, and, upon occasion, of the public. The hall is equipped with a moving picture outfit which is used for instruction and entertainment. A well-planned stage encourages student dramatics.

HEALTH AND RECREATION

Provision is made for the physical welfare of students through organized sports and games, including gymnasium work, basket-ball, tennis, hikes, skiing, swimming, and health clubs. The water

OUTING AT WHALOM LAKE

sports are at a lake some distance away but easily reached by trolley.

The health of students is carefully guarded both by physical training with its attendant instruction in hygiene, and by the presence of a trained nurse who serves as matron of one of the dormitories. A suite of several beds is reserved as an infirmary, where upon occasion students in need of quiet surroundings or especial care, or who may have been exposed to any contagion, may be isolated. The nurse is also at the service of students who consult her about minor ailments, and is prompt to call a physician when symptoms are such as to require medical treatment. She also co-operates with the instructor of hygiene and physical education, supplements the school physician in guarding the welfare of the children of the junior high school, and assists the practice teachers in watching the children's physical condition.

Health and vitality are so essential to successful teaching that it is particularly necessary in training teachers to inculcate those habits of breathing, eating, sleeping, sitting, standing, exercise, and other bodily functions which will, in the long run, serve to keep a person at his best. This is a patriotic duty in a normal school in the same sense and for the same reason that it is in an army.

DORMITORY CUSTOMS

When many persons live together as students do in dormitory and dining-hall, certain social habits must be cultivated for the common good. If insistence upon these habits seems in any way to restrict freedom, it is not really a restriction but a means of securing freedom to all, under conditions that would otherwise limit the freedom of all. Those who would be teachers must learn to recognize as fundamental in civilized society, and to put into practice, certain general principles relating to the attitude of an individual toward the community in which he finds himself. Students sometimes handicap themselves and diminish their capacity to serve the State by neglecting these principles.

Parents will render a service, both to their children and to the Commonwealth, by helping to convince their sons and daughters who are in training as teachers, of the value to them for all future time, both professionally and personally, of early acquiring those habits that promote physical and social welfare under the conditions they are likely to meet. The support of parents is especially needed in the case of students who live at home. The necessity of yielding some degree of individual freedom in order to secure greater freedom within the group is readily recognized by students in the dormitories, but this important lesson is often missed by those who reside away from the school. Regularity of meals and of study hours is an obvious necessity in the group. It is equally desirable for the individual. The homes will not only reinforce the school but will confer a real benefit upon their students by encouraging them to maintain at home the same daily routine as is followed by the dormitory students.

COURSES

This school, in common with the other normal schools of this State and of most of the states, maintains a two-year course for the training of teachers for the elementary schools. The minimum essentials in each subject of this course have been outlined tentatively for all the Massachusetts schools, and these outlines are being tried out by each school in its own way.

COURSE FOR ELEMENTARY TEACHERS

The elementary course in this school conforms substantially to the plan outlined for the two-year course in all the State normal schools, but lays especial emphasis upon the so-called practical arts. The attempt is made to apply in all the courses the principle of beginning with the concrete and the immediate, with what to the pupil will seem purposeful and practical, and leading on to general conclusions and to that recognition of deferred values which characterizes civilized life, as distinguished from primitive life wherein men dwell only in the present.

COURSE FOR JUNIOR HIGH SCHOOL TEACHERS

The advanced course is offered for students who desire to teach in higher elementary grades or in junior high schools or who wish a broader background for primary teaching. The first year of this course is identical with that of the elementary course. The second year differs slightly, and students who so desire are given opportunity to practice in seventh and eighth grades instead of in the lower grades.

Although this course covers four years it must be reckoned a three-year course. The third year is spent in teaching service on salary with some supervision by the normal instructors but wholly free from study or instruction in the normal school. This not only makes it easier for students to finance their way, but because of the year of teaching they bring to their final year a maturity of mind and a background of experience which make possible a more advanced and more inclusive program than could be given to the same students immediately upon the completion of the first two years.

While personality enters largely into the competition, and, particularly in the present acute demand for teachers, graduates of the elementary course sometimes go directly into positions as good as do graduates of the advanced course, the fact remains that em-

players who visit the normal school in search of teachers for the better positions invariably canvass the advanced students first. Again, the tendency in the State, and in other states as well, is more and more to recognize superior training in fixing salary schedules, and to insist upon it for promotion to higher positions.

This course is especially recommended to those who hope for advancement to supervisory positions or principalships.

It is open to men as well as to women, and is credited for three years toward the degree of Bachelor of Education now offered by the State for a four-year normal course.

PRACTICAL ARTS DEPARTMENT

The Practical Arts Course prepares young men for teaching the manual arts to boys in grade schools, junior and senior high schools, and continuation schools. It is planned as a three-year course, but students already skilled in a trade may complete it in shorter time by attending summers.

The students are given training in woodworking, woodfinishing, painting and glazing, sheet metal, automobile repairs and other metal repair work, drafting, printing and bookbinding, gardening. They have opportunity to practice teaching one or more of these crafts to boys of the junior high school. They also have instruction in English, civics, science, and mathematics related to the trades, psychology, and methods of teaching and administration.

Unless they have had previous trade experience, it is not expected that students will go out prepared to teach these trades as trades; but they are given such insight into all of them as will enable them to teach boys how to meet many of the problems of construction and repair that arise in the course of every day life. A student who, before entering school, has had successful experience in any one trade may so supplement his command of that trade, by learning the elements of related trades, that he may be prepared to teach his own trade more successfully and to include in his instruction a wider range of projects than would otherwise be possible.

The course affords a special opportunity to men who have learned a trade and have discovered in themselves an aptitude for helping others to learn it. The State needs such men, and the men need to learn effective methods of teaching. Journeymen of any trade will find it worth while to inquire into the opportunities here afforded.

The graduates of this course are successfully filling places of responsibility in high schools, manual training schools, and continuation schools. The continuation schools are creating a new and urgent demand for men who can teach intelligently, and young men are going immediately to better paying positions than formerly were open to teachers even after years of experience.

SUMMER TERM

The summer session serves to continue the elementary and practical arts courses, and enables students either to make up deficiencies or absences of previous terms, or, for persons of some experience, to anticipate the work of future terms, and so to hasten the completion of their courses. The main purpose, however, is to afford opportunity for teachers in service to refresh themselves upon their normal training and to broaden their outlook, and for those who were forced to begin teaching without, or with only partial normal training, to make good this deficiency and to obtain credit toward a normal diploma without excessive loss of teaching time. Correspondence with such teachers, and with teachers out of service who desire to return to it, is invited. A statement of the needs and desires of those who are considering attendance will assist in planning courses to meet the real demand.

The courses are given by instructors who conduct the same or similar courses, either here or elsewhere, during the school-year.

Persons engaged in teaching, and endorsed by their superintendents, are admitted to summer school without examination or certification, but credit toward a diploma will be given only to those who have complied with the regular admission requirements.

Application blanks will be sent upon request. Early applicants are favored in the choice of rooms.

SEASONAL COURSES

Because of the opportunity offered by the summer course for continuous work throughout the year, provision has been made in former years for the admission of classes in July and February, as well as in September. The July admission was planned to enable students to secure a two-year diploma by continuous attendance for one school-year and two summer terms plus a third summer term following a year of teaching. Students were thus in residence

for a period equal to the portion of the regular course devoted to instruction, omitting only the period of practice teaching, for which the year's teaching prior to the final summer term was reckoned an equivalent. This was to favor those who must get to earning at the earliest possible moment.

Since the summer term has been shortened, more than three summers will be required, depending upon the number of credits obtained in the individual case.

This modified course is of advantage to persons who have already had experience in teaching, or other experience or training that justifies advanced standing. Those who enter direct from secondary schools are not advised to undertake it.

The February admission did not lead to a shortened course, but was designed to favor some who graduate from high school at mid-year, and others who decided too late, and for this or other reasons, were unable to enter in September. The numbers to enter in February and July have been too small to justify organizing separate classes for them. Since the September class is now so large it seems best not to resume the February or to encourage July entrance until such time as the interest of a larger number of students demand such opportunities.

EXPENSES

Tuition is free to residents of Massachusetts. Residents of other states, may be admitted upon payment in advance of a tuition fee of twenty-five dollars each semester, provided there is room.

The charge for room and board in the dormitories is \$250 for the school-year of thirty-eight weeks, payable monthly in advance. This includes laundry to the amount of fifty cents per week. The charge for the summer term is at substantially the same rate.

Rooms are reserved upon deposit of six dollars and a half. This deposit will be credited for the first week's board in the fall, but will not be refunded in case a student cancels the reservation, unless for exceptional reasons.

OCCUPANCY OF ROOMS

It is found desirable to set certain limits to the choice of rooms in order to secure a wholesome distribution of students of the several classes in the two dormitories. Within these limits students of

Senior and Advanced classes are free in May to make choice of rooms for the next school year, and rooms for new students are reserved in order of application.

Rooms are open to students in training on the Tuesday after Labor Day; to those coming for examination, on the following Saturday (temporarily); and to all students on Tuesday of the following week.

Table board is supplied to those not rooming in the dormitories at \$5.00 per week, payable in advance.

Students who room in the dormitories should bring their own towels, sheets, blankets (for single bed), and pillow-cases. All pieces of clothing will be marked at the laundry. Students may do any work they desire in the laundry-room in one of the dormitories. All the young women in attendance should supply themselves with gymnasium suit and shoes, and with bathing cap for the showers.

SELF HELP AND PECUNIARY AID

Earnest students to whom the expense of a normal school course is a serious obstacle may in many instances find opportunity to earn, if they will make known their needs and indicate the kind of work they are prepared to do.

There is also a scholarship fund appropriated by the State. This is to aid worthy students who might be unable without such assistance, or without over-taxing their strength, to complete their training. This fund is available only to Massachusetts students who come from outside of Fitchburg, who have been in attendance at least a half-year, and whose scholarship standing is good. The purpose of the State in providing this fund is to prevent the loss to its schools of trained teachers who might not otherwise be available. It is not at all in the nature of charity. Students of the quality for which this aid is intended need, therefore, feel no hesitation when applying for it, or humiliation in receiving it. If their time and strength permit, they may render in return some definite service to the school.

The Alumni Loan Fund is available to worthy students needing help. Sums not exceeding \$100 annually will be loaned, to be repaid after graduation, at a low rate of interest.

ADMISSION

I. APPLICATION FOR ADMISSION. Every candidate for admission to a normal school is required to fill out a blank entitled "*Application for Admission to a State Normal School*" and send it to the principal of the normal school that he desires to enter. This blank may be secured from the principal of the high school or the normal school and should be filed as soon after January 1 of the senior year as the candidate decides to apply for admission.

II. BLANKS TO BE FILED BY THE HIGH SCHOOL PRINCIPAL. The principal of the high school last attended is expected to fill out two blanks—one giving the "*High School Record*" and the other a "*Rating of Personal Characteristics*"—and send them to the principal of the normal school.

III. GENERAL QUALIFICATIONS. Every candidate for admission as a regular student must meet the following requirements:

1. AGE. A woman must be at least 16 and a man 17 years of age on or before September 1 of the year of admission. (To be admitted to the Household Arts Curriculum, at Framingham, a candidate must be at least 17.)

2. HEALTH. The candidate must be in good physical condition and free from any disease, infirmity, or other defect that would unfit him for public school teaching.

3. HIGH SCHOOL GRADUATION. The candidate must be a graduate of a standard four-year high school, or have equivalent preparation.

4. COMPLETION OF FIFTEEN UNITS OF HIGH SCHOOL WORK. The "*High School Record*" must show the completion of fifteen units accepted by the high school in meeting graduation requirements, a unit being defined as follows:

"A unit represents a year's study in any subject in a secondary school, so planned as to constitute approximately one-fourth of a full year of work for a pupil of normal ability. To count as a unit, the recitation periods shall aggregate approximately 120 sixty-minute hours. Time occupied by shop or laboratory work counts one-half as much as time in recitation."

5. PERSONAL CHARACTERISTICS. The "*Rating of Personal Characteristics*," and the moral character of the candidate, must, in the judgment of the principal of the normal school, warrant the admission of the candidate.

IV. SCHOLARSHIP REQUIREMENTS. Of the 15 units presented for admission, at least 10 must be selected from the list given below in Section V and must be of a satisfactory grade as determined by certification or examination. Three of these units must be in English and one in American History and Civics. Applicants for admission to the Practical Arts Curriculum of the Fitchburg Normal School may substitute evidence of practical experience in some industrial pursuit to meet a part of the above requirements. The Normal Art School requires in addition an examination in Drawing.

1. CERTIFICATION. Credit by certification may be granted in any subject in which the candidate has secured a certifying mark (A or B) in the last year for which such credit is claimed, provided that the student is a graduate of a Class A high school or is in the upper half* of the graduating class of a Class B high school.

2. EXAMINATION. Any candidate not securing credit by certification for ten units must either:

(1) Secure credit in the remaining number of units by examination in subjects chosen from the list in Section V, or

(2) In addition to the required subjects, take three comprehensive examinations aggregating six units from the subjects listed in Section V, these units to be chosen from three of the six following fields: (a) Social Studies, (b) Science, (c) Foreign Language, (d) Mathematics, (e) Commercial Subjects, and (f) Fine and Practical Arts.

Since the second plan involves five comprehensive examinations the examination papers and school record of candidates using this plan will be judged as a whole.

*The upper half of a graduating class shall, for this purpose, consist of those pupils who have obtained the highest rank as determined by counting for each pupil in the graduating class the number of units in which he has secured the mark of B increased by twice the number of units in which he has secured the mark of A.

V. LIST OF SUBJECTS FOR CERTIFICATION OR EXAMINATION. REQUIRED:

English Literature and Composition	3 units.
American History and Civics	1 unit.

ELECTIVE:

The candidate may choose the six elective units from any of the units listed below, but these units must be so distributed that the number offered in any field shall not exceed the following:

Social Studies	3 units.
Science	3 units.
Foreign Language	4 units.
Mathematics	3 units.
Commercial Subjects	4 units.
Fine and Practical Arts	3 units.

SOCIAL STUDIES

Community Civics	$\frac{1}{2}$ or 1 unit.
History to about 1700	1 unit.
European History since 1700	1 unit.
Economics	$\frac{1}{2}$ unit.
Problems of Democracy	$\frac{1}{2}$ unit.
Current Events	$\frac{1}{2}$ or 1 unit.
Ancient History	1 unit.
English History	1 unit.
Medieval and Modern History	1 unit.

SCIENCE

General Science	$\frac{1}{2}$ or 1 unit.
Biology, Botany, or Zoology.....	$\frac{1}{2}$ or 1 unit.
Chemistry	1 unit.
Physics	1 unit.
Physical Geography	$\frac{1}{2}$ or 1 unit.
Physiology and Hygiene	$\frac{1}{2}$ or 1 unit.

FOREIGN LANGUAGE

Latin	2, 3, or 4 units.
French	2 or 3 units.
Spanish	2 units.
German	2 or 3 units.

MATHEMATICS

Algebra	1 unit.
Arithmetic	$\frac{1}{2}$ or 1 unit.
Geometry	1 unit.

COMMERCIAL SUBJECTS

Stenography (including Typewriting)	1 or 2 units
Bookkeeping	1 unit.
Commercial Geography	$\frac{1}{2}$ or 1 unit.
Commercial Law	$\frac{1}{2}$ unit.

FINE AND PRACTICAL ARTS

Home Economics	1, 2, or 3 units.
Manual Training	1 unit.
Drawing	$\frac{1}{2}$ or 1 unit.

The five additional units, necessary in order to make up the 15 units required for graduation, may consist of any work which the high school accepts as meeting its graduation requirements.

VI. PLACE, TIME, AND DIVISION OF EXAMINATIONS. Entrance examinations may be taken in June and September at any State normal school (including the Normal Art School) at the convenience of the applicant. A candidate may take all the examinations at one time or divide them between June and September. Students who have completed the third year in a secondary school may take examinations in not more than five units other than English, in either June or September. Permanent credit will be given for any units secured by examination or certification. Credit secured for admission to any college of the New England College Entrance Certificate Board, by examination or by certificate, may be accepted.

VII. ADMISSION AS ADVANCED STUDENTS. A graduate of a normal school or of a college, may be admitted as a regular or advanced student, under conditions approved by the Department.

VIII. ADMISSION OF SPECIAL STUDENTS. When any normal school, after the opening of the school year, can accommodate additional students, the Commissioner may authorize the admission as a special student of any mature person recommended by the principal as possessing special qualifications because of exceptional and vital experience and achievement outside of school. Special students are not candidates for diplomas or degrees until they qualify as regular students, but they may receive certificates from the Department upon the satisfactory completion of the work of any curriculum.

Mr. Livermore	—	—	—	—	186	209	216
Mr. Morrell	—	—	—	—	186	209	216

A period is forty-five minutes. This table shows the total periods for the year. Some courses may be given more periods per week for a shorter time or fewer periods for a longer time. Shop work is not divided into periods at all, but is continuous in one shop for a term of about ten weeks, twenty-two hours per week; then in another.

*Students in the third year of this course are engaged in teaching wherever they obtain positions. Thus, while they are still regarded as members of the school, they are not in actual attendance.

PSYCHOLOGY AND EDUCATION — MR. KIRKPATRICK
ELEMENTARY COURSE

PSYCHOLOGY — First Year — Five periods per week, 13 weeks

The usual topics in psychology are covered by class observation and experiment and by reading. Practice is given in applying the truths learned to teaching.

CHILD STUDY — Second Year — Four periods per week, 13 weeks

By the use of a text and by readings general truths are gained which are compared with observations in school, and with intensive studies of individual children made by students. Practice in some forms of scientific methods of studying and testing children are given.

JUNIOR HIGH SCHOOL COURSE

EDUCATION — Fourth Year — Four periods per week, 19 weeks

Elementary principles of sociology are studied and related to general problems of education and to the special problems of the junior high school and a special study is also made of the psychology of children of high school age.

PRACTICAL ARTS COURSE

FIRST YEAR PSYCHOLOGY — One period per week, 26 weeks

The course is similar to the elementary course but with special application to Practical Arts teaching.

APPLIED PSYCHOLOGY AND CHILD STUDY — Second Year —
One period per week, 26 weeks

Some of the principal truths as to the ways in which psychology may be used scientifically in promoting efficiency in various lines are studied and then applied to the teaching of practical arts to children of junior high school age.

HISTORY OF EDUCATION — THE PRINCIPAL

Seniors — Two periods per week, 13 weeks

The course aims to trace the development of our conception of education, the changing motives and methods, to insure a sense of proportion in observing present tendencies; to study public education as it is now administered; to gain some acquaintance with the laws that establish and regulate this administration and that determine the authority and relative responsibilities of teachers and school officials.

Fourth Year — Four periods per week, 26 weeks

The same, pursued more intensively and supplemented with a study of practical present day problems of education and administration.

SCHOOL MANAGEMENT — MR. HUBBARD

Juniors — Three periods per week, 13 weeks

This course aims to furnish the prospective teacher with a compendium of principles to guide in the organization and conduct of a school; to show how most effectively and economically to direct a group of pupils in the acquisition of useful facts, thrifty habits, sound principles, and high ideals of life and conduct to the end that each may become "socially efficient."

TEACHER TRAINING AND SPECIAL METHODS
IN PRACTICAL ARTS — MR. ANTHONY

TEACHER TRAINING — First Year, 97 periods — Second Year, 77 periods

This course is a study of the ways and means used in good teaching by which boys derive the desired values from their constructional activities in the Practical Arts.

SPECIAL METHODS — 80 periods

This course is a study of the growth, scope, and trend of Practical Arts Training in its relation to other kinds of general and industrial education.

HISTORY AND CIVICS — MR. HARRINGTON

HISTORY AND CIVICS I — Seniors — Four periods per week, 26 weeks

Aims and methods in history and civics teaching in the first six grades.

Incidental study of men and events in American history, both local and general.

Study of the origins of American civilization in the Old World.

Projects in community civics, government, and present day problems.

Development of correct civic ideals and habits.

HISTORY AND CIVICS II

Junior High School II — Three periods per week, 26 weeks

Aims and methods in teaching of history and civics in the junior high school.

HISTORY AND CIVICS III

Junior High School IV — Three periods per week, 19 weeks

Selected projects in American history and its Old World background.

Study of American political, social, and economic problems.

CIVICS FOR PRACTICAL ARTS MEN

First Year 38 periods — Second Year, 38 periods

Discussion of current questions and practical civics, based as far as possible on the experiences and interests of the classes.

ETHICS — MRS. MCLEAN

Juniors — One period per week, 19 weeks

Seniors — One period per week, 19 weeks

The purpose of this course is to foster the two essentials in the training of a teacher — Character and Personality.

SCIENCE — MR. SMITH

GENERAL SCIENCE — Juniors — Three periods per week, 13 weeks

The work consists of the study of projects based on the interests and surroundings of pupils in the first six grades.

It includes observation, laboratory work, individual reports to the class on special subjects and use of the best text-books.

GENERAL SCIENCE — Seniors — Four periods per week, 13 weeks

Such projects are selected as refer to industries, processes, inventions, and natural phenomena; to the study of common minerals and rocks with respect to their industrial importance and their relation to soil formation; to the development of scientific reasoning and facts for the student's use as a teacher.

GENERAL SCIENCE — Fourth Year — Two periods per week, 26 weeks

Special attention is given to the study of projects suitable for junior high school pupils dealing with their environment.

This includes laboratory work, a comparative study of text books, the working of projects and outlines of study, special reports to the class, drawings, etc.

Attention is also given to the cultural study of science.

GEOGRAPHY — MR. HARRINGTON — MRS. MCLEAN

GEOGRAPHY I — Juniors — Four periods per week, 26 weeks

Aims and methods in geography teaching in the first six grades.

Selected studies in the content of the subject, in order to insure the student's grasp of the principles of human geography.

Relationship between geography and current history.

GEOGRAPHY II — Junior High School II — One period per week, 26 weeks

Aims and methods in geography teaching in the junior high school.

GEOGRAPHY III — Junior High School IV — Three periods per week, 19 weeks

Cultural and scientific study of geography.

NATURE STUDY AND GARDENING — MR. RANDALL

First Year — Two periods per week

This course deals with the more common objects of nature that appeal to the interests of children of the first six grades of the elementary schools. The aim of the course in the first three grades is sense development, and in the fourth, fifth, and sixth grades, to give the child information that leads to individual activity during the out-of-school hours. The course of study prepared for the elementary schools of Massachusetts is followed. Each normal school student is required to prepare teaching lessons on the subjects outlined for each grade. The large greenhouse, gardens, and the nearby fields and forests furnish an unusual laboratory for this branch of instruction.

SCHOOL DIRECTED HOME GARDENING

PRACTICAL ARTS — First Year

A course dealing with the theory and practice of school and home gardening, planned to prepare men of the Practical Arts Department for the supervision of home garden work of junior high and intermediate school pupils. Classroom instruction and a limited amount of practical work in the gardens and greenhouse are combined with actual practice in the supervision of home gardens of pupils of the seventh and eighth grades.

SCHOOL AND HOME GARDENING

PRACTICAL ARTS — Second Year — Two periods per week

An advanced elective course for men of the Practical Arts Department. A large part of time in this course is devoted to practical work in the gardens, greenhouse, and nature study laboratory. Students are required to prepare teaching lessons adapted to grammar school grades. A part of the time is spent in teaching practice, as supervisors of home gardens of the children of the normal practice schools, and other nearby schools.

ENGLISH LITERATURE AND COMPOSITION — MISS WILLIAMS

Fourth Year — Four periods per week, 26 weeks

This course makes a study of the basic principles of English as applied to the upper grades. A rapid survey of the history of each of the chief types of literature will be followed by extensive reading of representative writers. Collateral reading and reports will be required.

Seniors — Four periods per week, 26 weeks

This course includes detailed study of written composition, oral composition, and grammar, as well as a study of selected masterpieces with a view to cultivating appreciation of literature.

ORAL EXPRESSION — Juniors — One period per week, 19 weeks

Attention is given to a detailed study of the spoken word with especial emphasis upon articulation, pronunciation, change of pitch, force, and transition.

ENGLISH — MISS McCARTY

First Year — Four periods per week, 26 weeks

This course deals with:

I HISTORY AND PSYCHOLOGY OF READING

Principles and methods of teaching reading and discussion of present day methods.

Reading and criticism of children's literature.

Principles, sources, and manner of story telling.

Observation of story telling in practice school.

Story telling to children and normal students.

II LANGUAGE AND SPELLING

Principles and methods of presentation of language and spelling lessons.

Projects worked out for language use.

Observation of reading, language, and spelling lessons, and story telling in practice schools.

Planning and teaching of lessons to classes of children.

LIBRARY INSTRUCTION — MISS HASSELL

Three periods per week, 13 weeks

This course aims to give a knowledge of the use of books and libraries. A study is made of reference books, periodicals indexes, and current magazines; also methods employed by the modern library, its arrangement, classification, catalog, etc.

ARITHMETIC AND PENMANSHIP — MISS DOLAND

ARITHMETIC — Juniors — Four periods per week, 26 weeks

Aim: To prepare students to teach to children of the first six grades, number facts, fundamental processes, fractions, decimal and non-decimal, with their applications in percentage, in a manner so

intelligent that the pupils may gain facility in number at the least possible time cost.

Method: Study of subjects designed for each grade, demonstration lessons, experimental teaching by students in classroom with discussion of the effort, observation lessons, writing lesson plans, study of text books, teaching in training schools under direction of training school supervisor in co-operation with Normal School instructor.

PENMANSHIP — Juniors — One period per week 38 weeks

Preparation one and one-half hours per week

Seniors — One period per week, 13 weeks

Aim: To train students to write well on blackboard and on paper for schoolroom use and for other professional purposes; to prepare students to teach muscular movement penmanship in grade schools.

Method: Individual practice, classroom teaching, discussion, study of different systems of penmanship.

MATHEMATICS AND RELATED WORK — MR. CLANCY

PRACTICAL ARTS — First Year, — Two periods per week, 26 weeks

Second Year — Two periods per week, 26 weeks

Third Year — Two periods per week, 38 weeks

This course is intended to prepare students in the Practical Arts and Junior High school courses, to teach mathematics or shopwork in the intermediate grades or junior high schools or in manual training schools.

J. H. S. II — Four periods per week, 13 weeks

J. H. S. IV — Two periods per week, 26 weeks

This course consists of a study of the content and of the teaching methods used in arithmetic, geometry, and algebra, as taught in the junior high schools and prevocational schools. The related work deals chiefly with shop problems and the correlation of these problems with the regular academic studies of the junior high school.

FRENCH — MISS GRAMMONT

Fourth Year — Three periods per week

This course comprises the theory and method of teaching French in the junior high school, and the study of the language for its cultural value.

All class work is conducted in French to better enable the student to master the French accent.

PHYSICAL EDUCATION AND HYGIENE — MISS LAWLER

First Year — Three periods per week, 38 weeks

The aim is to build up the health of the student and to give instruction in the theory and practice of Physical Education. A note book containing a certain number of games, classified according to grades, is one of the requirements.

Special emphasis is placed on posture, and frequent posture tests are taken by the students. One period in two weeks is devoted to instruction in personal hygiene. Fundamental principles in the care of the health are studied.

Second Year — Three periods per week, 26 weeks

Theory and practice continued, with more emphasis on theory. Professional attitude stressed.

Fourth Year — Two periods per week

Theory and practice, with stress on practice teaching assignments.

Methods of teaching hygiene appropriate to each grade studied. A student assistant has charge of the "play periods" in the training schools. Supplementing this instruction a health club is organized and conducted by the students, all competing for class and school honors. The Art Department co-operates by giving suggestions and by acting as judges in the poster work, which is included in the Club program.

Another supplementary agency is the Girls' Athletic Association organized for the purpose of providing physical and recreational opportunities, promoting good spirit, and developing leadership among its members. Hikes are organized, a basketball tournament arranged, tennis encouraged, and a field day, participated in by students and faculty, is conducted in the spring.

MUSIC — MISS BARR

First Year — Two periods per week, 38 weeks

Second Year — Two periods per week, 26 weeks

Fourth Year — Two periods per week, 13 weeks

This course covers the subject matter of music taught in the public schools. Special attention is given to the study of note singing, ear training, voice training, enunciation, and interpretation. Lesson plans are made and discussed and teaching lessons are given in the classroom.

The entire school is assembled twice a week for a half period of chorus singing, and trained in the singing of selections of especial merit.

MUSIC APPRECIATION—First Year—13 periods. Second Year—13 periods
Fourth Year—13 periods

This course aims to make intelligent listeners and create an appreciation of the beautiful in music.

Folk songs, art songs, opera, oratorio, and symphonic forms are studied with the lives of the great composers. These are illustrated by piano and victrola.

A school orchestra and a glee club are organized for special work.

DRAWING — MISS LAMPREY

Junior Year—Two periods per week, 26 weeks
Expected preparation not to exceed two periods per week

To give knowledge of what is taught in drawing in grades one to six, and how it should be taught.

Study of selected curricula, method, and content. Illustrated by observation.

Senior Year—Two periods per week, 26 weeks
Expected preparation not to exceed two periods per week

To develop artistic appreciation. To develop skill in drawing and design through projects in which the student is especially interested.

Blackboard work.

JUNIOR HIGH SCHOOL COURSE

Fourth Year—Two periods per week, 38 weeks
Expected preparation not to exceed two periods per week

What shall be taught, and how, in junior high school drawing and design. Interior decoration. Picture study. Blackboard work. Selected projects in which the student is especially interested.

HANDWORK — MISS CONLON

Junior Year—Two periods per week, 26 weeks

The course is based upon a study of individual, group, and class projects suitable for children in grades from one to six.

The elements of design and theory of color, as applied to handwork, are developed in working with such mediums of expression as paper and cardboard construction, simple weaving, sand tables, stick printing, stenciling, clay modeling, and elementary woodwork.

Senior Year — Two periods per week, 26 weeks

The aim is to develop practical knowledge and appreciation of handwork, both as a subject and as a method, by a study of the educational meaning of manual arts, and by working out projects in a variety of craft materials. Such crafts as bookbinding, reed and raffia basketry, weaving, and block printing are included in this course. Work with leather, metal, stencils, wood, clay, etc. is optional.

JUNIOR HIGH SCHOOL COURSE --- Fourth Year

Two periods per week, 26 weeks

The general aim is the same as that of the Senior Course. In addition to the crafts included in that course, there are the following: woodworking, stenciling, advanced bookbinding, copper work, pottery, pine needle basketry, and leather work. Jewelry, chair caning, batik, gesso, cement-pottery, weaving, and sealing-wax work are optional.

MECHANICAL DRAWING — MR. MACLEAN

PRACTICAL ARTS MEN — One-seventh to one-fifth of the entire course

The course consists of free hand and mechanical drawings of objects to be made to meet school and home needs. These drawings and others present training in design and principles of construction — geometric, orthographic, and isometric problems; choice and care of equipment and materials; blue-printing; writing of specifications.

WOODWORKING — MR. COLBURN

PRACTICAL ARTS MEN — One-seventh to one-fifth of the entire course

Handwork and machine work in making and repairing objects, which meet a need in the school, home, and community and also afford training in the following processes: Laying out work, shaping, joining, assembling, etc. Selection, ordering, and care of equipment and materials.

WOODFINISHING — MR. AKELEY

PRACTICAL ARTS MEN — One-seventh to one-fifth of the entire course

Finishing and refinishing of objects needed for use in the school and home involving training in staining, shellacking, varnishing, mixing of colors, painting, elements of interior decoration, and glazing. Writing of specifications for the various projects and estimating the

cost of labor and material for the same. Selection and care of equipment and materials and the making out of orders for the same.

PRINTING — MR. LIVERMORE

PRACTICAL ARTS MEN — One-seventh to one-fifth of the entire course

The purpose of this course is to instruct men in the fundamental principles pertaining to letter-press printing and typography; to that degree that they shall be able to teach pupils of the junior and senior high schools in the art. Each student is required to do a minimum number and variety of projects, to give him actual experience in producing work of commercial value to meet his own and school needs.

GENERAL REPAIRS — MR. MORRELL

PRACTICAL ARTS MEN — One-seventh to one-fifth of the entire course

This course aims to train students in the proper use of a variety of machinists' tools, and in the practical methods of repairing and constructing objects for schools and homes.

Automobile Repair Work.

Machine Shop Work — A variety of operations involved in repairing and erecting.

Plumbing — Care and repair of fixtures in the school and dormitories.

Sheet Metal Work — Interesting problems in construction and the making and repair of useful articles.

Electrical Work — Practical wiring problems. Care and repair of electric motors and lighting fixtures.
